WORK EXPERIENCE / PROJECTS

COURIER MANAGEMENT SYSTEM PROJECT | VIT-AP University, Amravati

Developed a Courier Management System using Java (Swing) and MySQL(database) individually, enabling efficient package tracking, secure user authentication, and streamlined order management. Implemented a user-friendly interface for clients and administrators, contributing to improved logistics and delivery processes.

ACCIDENT PREVENTION DEVICE | VIT-AP University, Amravati

Developed a "Smart Helmet" hardware project using Arduino to detect accidents, enforce helmet usage, and track real-time location through a Java-based Android app. My role in the group project was specifically focused on creating the mobile application. This project was ranked in the top-10 in my college.

TRAVEL MANAGEMENT SYSTEM PROJECT | Christ Academy, Bengaluru

Developed a Travel Management System using Python individually thereby learning and implementing real-life applications of Python and understanding its fundamentals. Developed the GUI interface of the project using Tkinter and used MySQL as my database.
